

Faya Admin Portal — Country Operations, Staff Roles & Department Access

1. Product Name

Faya Admin Portal

2. Product Purpose

The Faya Admin Portal is the internal web/admin system used by Faya staff to manage the platform across different African countries.

It controls:

- Country-by-country operations
- Country-specific compliance rules
- Customer KYC review
- Merchant KYB review
- Merchant devices and terminals
- Staff accounts
- Staff departments
- Staff roles
- Country permissions
- Audit logs
- Risk monitoring
- Disputes
- Settlements
- Support
- Compliance investigations
- Fraud operations
- Regulatory reporting

The Admin Portal must support different staff logins, different departments, and different permission levels per country.

Example:

A Nigeria compliance officer should be able to review Nigerian KYC/KYB cases, but not automatically access Ghana, Kenya, South Africa, or Egypt unless granted permission.

3. Core Admin Concept

Every admin user must have:

- Staff profile
- Department
- Role

- Country access
- Permission set
- Login credentials
- MFA enabled
- Status
- Audit trail

Access must be controlled by:

Department + Role + Country + Permission

Example:

Department: Compliance
 Role: KYC Reviewer
 Country Access: Nigeria
 Permissions: View KYC, Review KYC, Request Documents, Approve Low Risk

Another example:

Department: Operations
 Role: Terminal Operations Agent
 Country Access: Ghana, Kenya
 Permissions: View Terminal Requests, Update Shipping Status, Assign Terminal

4. Admin Portal Departments

The Admin Portal should support these departments.

4.1 Super Admin

Purpose:

Highest internal access. Used only by founders, CTO, Head of Operations, or trusted platform administrators.

Can:

- Create countries
- Activate/deactivate countries
- Create admin staff
- Assign departments
- Assign roles
- Assign country access
- Configure global platform settings
- Override country settings
- View all audit logs

- Suspend staff
- Reset staff MFA
- Approve high-risk manual actions
- Access emergency controls

Should be limited to very few users.

4.2 Country Admin

Purpose:

Responsible for one country or a group of assigned countries.

Can:

- View dashboard for assigned country
- Manage country-specific KYC/KYB rules
- View customers in assigned country
- View merchants in assigned country
- View terminals/devices in assigned country
- View country settlements
- View country disputes
- View country support tickets
- Invite country staff, if allowed
- Escalate to Super Admin
- Generate country reports

Cannot:

- Access unassigned countries
- Change global rules
- Create Super Admins
- Disable audit logs
- Modify financial ledger directly

4.3 Compliance Department

Purpose:

Handles KYC, KYB, sanctions, PEP, AML, regulatory review, risk flags, and document verification.

Roles:

- KYC Reviewer
- KYB Reviewer
- Senior Compliance Analyst
- Compliance Manager
- AML Investigator
- Sanctions/PEP Analyst
- Regulatory Reporting Officer

Can:

- Review customer identity submissions
- Review merchant business submissions
- Approve/reject KYC
- Approve/reject KYB
- Request additional documents
- Run sanctions/PEP review
- Mark cases for manual review
- Escalate suspicious cases
- Freeze account for compliance reason
- Recommend account closure
- Export compliance reports
- View regulatory reporting data

Cannot:

- Change payment processor settings
- Change settlement bank account without approval workflow
- Delete customer records
- Delete merchant records
- Approve their own escalated case if dual approval is required

4.4 Risk and Fraud Department

Purpose:

Monitors transaction risk, device risk, merchant abuse, fraud patterns, chargebacks, suspicious activity, and compromised accounts.

Roles:

- Fraud Analyst
- Risk Analyst
- Senior Risk Analyst
- Fraud Manager
- Device Risk Analyst
- Transaction Monitoring Analyst

Can:

- View transaction risk alerts
- View fraud scores
- View suspicious devices
- Block device
- Restrict merchant
- Restrict customer
- Flag transaction
- Hold settlement
- Escalate to Compliance
- Review unusual transaction patterns

- Add merchant/customer to watchlist
- Create fraud case
- View card/NFC failure patterns

Cannot:

- Approve KYB unless compliance permission is granted
- Change country compliance rules
- Change fees
- Create admin users

4.5 Merchant Operations Department

Purpose:

Manages merchant onboarding, merchant support, terminal requests, phone POS setup, branch/staff support, and merchant account operations.

Roles:

- Merchant Support Agent
- Merchant Onboarding Agent
- Merchant Operations Analyst
- Terminal Operations Agent
- Merchant Operations Manager

Can:

- View merchant profile
- Assist merchant onboarding
- View KYB status
- Request missing merchant documents
- View terminal requests
- Update terminal delivery status
- Assign terminal to merchant
- View phone POS requests
- Help merchants assign devices
- Open merchant support tickets
- View merchant transaction summaries
- Escalate merchant risk/compliance issues

Cannot:

- Approve high-risk KYB alone
- Manually credit merchant balance
- Change settlement status
- Override risk holds
- Access unassigned countries

4.6 Terminal and Device Operations Department

Purpose:

Handles physical terminals, SoftPOS devices, device activation, logistics, device blocking, replacements, and device monitoring.

Roles:

- Device Support Agent
- Terminal Logistics Agent
- Terminal Activation Agent
- Device Risk Agent
- Device Operations Manager

Can:

- View device inventory
- View terminal serial numbers
- View terminal requests
- Update delivery/shipping status
- Activate terminal
- Block lost terminal
- Mark terminal damaged
- Request replacement
- Approve phone POS device after checks
- View device health
- View device audit events

Cannot:

- See full settlement bank details unless permitted
- Approve merchant KYB unless assigned
- Change fees
- Change country rules

4.7 Finance and Settlement Department

Purpose:

Manages merchant settlements, settlement failures, bank account validation, reconciliation, fees, reserves, and payout reporting.

Roles:

- Settlement Analyst
- Reconciliation Analyst
- Finance Analyst
- Finance Manager
- Fee Operations Analyst
- Reserve Analyst

Can:

- View settlement batches
- View merchant bank account verification status

- View payout failures
- Retry settlement where allowed
- Hold settlement with approval
- Release settlement hold with approval
- Download settlement reports
- Reconcile processor/acquirer reports
- View fee breakdown
- View reserve rules
- Export finance reports

Cannot:

- Approve KYC/KYB unless compliance permission is granted
- Change merchant ownership
- Delete transactions
- Change transaction amount
- Manually edit ledger balances without controlled workflow

4.8 Customer Support Department

Purpose:

Handles customer tickets, merchant tickets, disputes, app issues, account help, payment complaints, terminal support, and basic operational support.

Roles:

- Customer Support Agent
- Merchant Support Agent
- Support Supervisor
- Support Manager
- Dispute Support Agent

Can:

- View support tickets
- Respond to tickets
- View limited customer profile
- View limited merchant profile
- View transaction status
- Resend receipt
- Escalate to Risk, Compliance, Finance, or Device Ops
- Request document resubmission
- Add notes to case

Cannot:

- View full identity documents unless permitted
- Approve KYC/KYB
- Change settlement details
- Refund without permission
- Block accounts except through escalation

4.9 Disputes and Chargebacks Department

Purpose:

Handles card disputes, chargebacks, merchant evidence, customer complaints, and acquirer/scheme dispute timelines.

Roles:

- Dispute Analyst
- Chargeback Analyst
- Senior Dispute Analyst
- Dispute Manager

Can:

- View disputed transactions
- Request merchant evidence
- Upload evidence to processor/acquirer workflow
- Track dispute deadlines
- Mark dispute won/lost
- Escalate fraud cases
- Communicate with merchant support
- View receipts and transaction metadata

Cannot:

- Change transaction amount
- Delete dispute record
- Approve merchant KYB
- Change merchant settlement account

4.10 Engineering and Technical Operations

Purpose:

Used by engineering, DevOps, and technical operations to monitor systems without exposing unnecessary sensitive data.

Roles:

- Developer Read Only
- Technical Support Engineer
- DevOps Engineer
- Security Engineer
- Engineering Manager

Can:

- View system health
- View logs with masked sensitive data
- View API errors

- View device connectivity status
- View processor/acquirer integration status
- View deployment status
- Trigger safe re-sync jobs
- View non-sensitive transaction metadata

Cannot by default:

- View full identity documents
- View raw personal documents
- View full bank details
- Approve compliance
- Change financial records
- Manually edit balances

Sensitive access must require additional permission and audit.

4.11 Legal and Regulatory

Purpose:

Handles regulator requests, legal holds, law enforcement requests, country reporting, and compliance governance.

Roles:

- Legal Officer
- Regulatory Officer
- Data Protection Officer
- Legal Manager

Can:

- View regulatory reports
- View legal hold cases
- Export approved legal data
- Track regulator submissions
- View customer/merchant compliance history
- Add legal hold
- Add regulatory note

Cannot:

- Modify transactions
- Approve payments
- Manually release settlements
- Create staff unless admin permission granted

5. Country Management

5.1 Country Admin Page

Each country must have its own admin page.

Example country pages:

- Nigeria Admin
- Ghana Admin
- Kenya Admin
- South Africa Admin
- Egypt Admin
- Morocco Admin
- Rwanda Admin
- Uganda Admin

Country page URL pattern:

```
/admin/countries/{countryCode}
```

Example:

```
/admin/countries/NG  
/admin/countries/GH  
/admin/countries/KE
```

5.2 Country Dashboard

Each country dashboard shows:

- Country name
- Country code
- Country status
- Currency
- Time zone
- Local regulator
- Country launch status
- Active customers
- Active merchants
- Pending KYC
- Pending KYB
- High-risk alerts
- Active terminals
- Active phone POS devices
- Today's transaction volume
- Today's approved transactions
- Today's declined transactions

- Pending settlements
- Held settlements
- Open disputes
- Open support tickets
- Compliance alerts

Country statuses:

- Draft
- Internal testing
- Pilot
- Live
- Restricted
- Suspended
- Closed

5.3 Country Configuration

Country Admin can configure:

- Currency
- Supported payment methods
- Settlement currency
- KYC requirements
- KYB requirements
- Accepted identity documents
- Required identity numbers
- Proof of address rules
- Liveness requirements
- Merchant onboarding rules
- Terminal availability
- Phone POS availability
- Transaction limits
- Settlement schedule
- Risk thresholds
- High-risk industries
- Support operating hours
- Local tax/VAT settings
- Regulatory reporting schedule

5.4 Country KYC Rules

For each country, admin should configure:

- Required customer identity number
- Accepted government ID documents
- Liveness required or not
- Proof of address required or risk-based
- Minimum age
- Sanctions/PEP required
- Local database verification provider
- Manual review threshold

- KYC tier levels
- Documents for citizens
- Documents for foreign residents
- Documents for diaspora users

Example Nigeria:

```
{
  "country": "NG",
  "requiredIdentityNumbers": ["BVN", "NIN"],
  "acceptedDocuments": [
    "national_id",
    "passport",
    "drivers_license",
    "voters_card",
    "residence_permit"
  ],
  "livenessRequired": true,
  "proofOfAddress": "risk_based",
  "sanctionsPepRequired": true
}
```

Example Ghana:

```
{
  "country": "GH",
  "requiredIdentityNumbers": ["ghana_card_pin"],
  "acceptedDocuments": [
    "ghana_card",
    "passport",
    "drivers_license",
    "residence_permit"
  ],
  "livenessRequired": true,
  "proofOfAddress": "risk_based",
  "sanctionsPepRequired": true
}
```

5.5 Country KYB Rules

For each country, admin should configure:

- Business types allowed
- Required business registration documents
- Required tax documents
- Required owner/director documents
- Beneficial owner requirements
- Business address proof
- Local licence requirements

- High-risk merchant categories
- Merchant transaction limits
- Settlement bank validation rules
- Phone POS eligibility
- Physical terminal eligibility

5.6 Country Device Rules

For each country:

- Physical terminal enabled: yes/no
- Phone POS enabled: yes/no
- Faya closed-loop NFC enabled: yes/no
- Allowed terminal models
- Allowed phone POS providers
- Minimum Android version
- NFC required
- Device integrity required
- Location requirement
- Staff PIN required
- Max transaction amount by device type
- Max daily device volume
- Terminal replacement policy
- Device inactivity policy

5.7 Country Settlement Rules

For each country:

- Settlement cycle
- Settlement bank country
- Supported settlement currency
- Settlement cutoff time
- Minimum settlement amount
- Rolling reserve rules
- Risk hold rules
- Manual review threshold
- Failed settlement retry rules
- Bank account name-match rules

Settlement cycle examples:

- T+1
- T+2
- Weekly
- Manual settlement during pilot

6. Staff Admin Page

6.1 Staff List

The Staff Admin page shows:

- Staff name
- Email
- Phone
- Department
- Role
- Countries assigned
- Status
- MFA status
- Last login
- Created by
- Created date

Filters:

- Department
- Role
- Country
- Status
- MFA enabled
- Last login date
- Created date

Staff statuses:

- Invited
- Active
- Suspended
- Locked
- Removed

6.2 Create Staff

Fields:

- First name
- Last name
- Work email
- Phone number
- Department
- Role
- Countries assigned
- Permission group
- Manager
- Require MFA
- Temporary password or invite link

- Start date
- Notes

Rules:

- Staff email must be unique.
- MFA required for all admin users.
- Super Admin approval required for high-risk roles.
- Staff must have at least one country unless global role.
- Staff must have department and role.
- Staff cannot assign permissions higher than their own.

6.3 Staff Profile

Shows:

- Staff ID
- Name
- Email
- Phone
- Department
- Role
- Country access
- Permission list
- MFA status
- Status
- Last login
- Failed login count
- Active sessions
- Audit history
- Manager
- Notes

Actions:

- Edit role
- Edit country access
- Reset password
- Reset MFA
- Suspend staff
- Unlock staff
- Remove staff
- Force logout
- View audit logs

7. Staff Login System

7.1 Login Methods

Admin staff login must support:

- Email + password

- MFA code
- Backup recovery code
- SSO later, optional
- Device/session trust, optional

Login flow:

1. Staff enters email and password.
2. Backend checks staff status.
3. Backend checks department/role.
4. Backend requires MFA.
5. Backend creates session.
6. Backend loads country access.
7. Backend loads permissions.
8. Admin lands on allowed dashboard.

7.2 MFA Rules

MFA is mandatory for:

- Super Admin
- Country Admin
- Compliance
- Finance
- Risk/Fraud
- Device Operations
- Legal
- Engineering with production access

MFA methods:

- Authenticator app
- SMS fallback, optional
- Email fallback, optional
- Recovery codes

7.3 Login Restrictions

Block login when:

- Staff is suspended
- Staff is removed
- Staff account is locked
- MFA not completed
- Password expired
- Role removed
- No country access assigned
- IP/device policy fails, if enabled

7.4 Session Rules

Sessions must:

- Expire after inactivity
- Require re-auth for sensitive actions
- Support forced logout
- Support single-session policy for high-risk roles, optional
- Record IP address
- Record device/browser fingerprint
- Record login country/location where available

Sensitive actions requiring re-auth:

- Approve KYB
- Reject KYB
- Release settlement hold
- Block account
- Create staff
- Change staff role
- Reset MFA
- Export sensitive data
- Change country rules
- Approve terminal activation
- Change risk limits

8. Permission Model

8.1 Permission Format

Permissions should use this format:

```
resource.action.scope
```

Examples:

```
kyc.view.country
kyc.approve.country
kyb.review.country
merchant.view.country
merchant.restrict.country
settlement.view.country
settlement.hold.country
staff.create.country
staff.manage.global
country.configure.global
device.block.country
```

```
terminal.assign.country  
support.respond.country
```

8.2 Permission Scopes

Scopes:

- Own
- Branch
- Country
- Region
- Global

Examples:

A support agent may have:

```
support.view.country  
support.respond.country  
customer.view_limited.country  
merchant.view_limited.country
```

A compliance manager may have:

```
kyc.view.country  
kyc.approve.country  
kyc.reject.country  
kyb.view.country  
kyb.approve.country  
kyb.reject.country  
sanctions.review.country  
account.restrict.country
```

A finance analyst may have:

```
settlement.view.country  
settlement.export.country  
reconciliation.view.country  
fees.view.country
```

9. Role-Based Access Matrix

9.1 Super Admin

Countries:

- All countries

Permissions:

- Full global access
- Staff management
- Country management
- Emergency controls
- Audit logs
- System configuration

Restrictions:

- Dual approval required for destructive financial actions.

9.2 Country Admin

Countries:

- Assigned countries only

Permissions:

- View country dashboard
- Manage country staff, if allowed
- View country merchants
- View country customers
- View country operations
- View reports
- Escalate issues

Restrictions:

- Cannot create Super Admin
- Cannot access unassigned countries
- Cannot modify global settings

9.3 KYC Reviewer

Countries:

- Assigned countries only

Permissions:

- View customer KYC
- Review documents
- Request resubmission
- Approve low-risk KYC
- Reject invalid KYC
- Add review notes

Restrictions:

- Cannot approve high-risk KYC alone

- Cannot change country rules
- Cannot view merchant settlement details unless assigned

9.4 KYB Reviewer

Countries:

- Assigned countries only

Permissions:

- View merchant KYB
- Review business documents
- Review owner/director documents
- Request additional documents
- Approve low-risk KYB
- Reject invalid KYB
- Add review notes

Restrictions:

- High-risk merchant approval requires senior compliance.
- Cannot release settlement holds.

9.5 AML Investigator

Countries:

- Assigned countries only or regional

Permissions:

- View suspicious activity
- View transaction monitoring alerts
- View customer/merchant risk profile
- Freeze account for AML reason
- Escalate SAR/STR case
- Add investigation notes
- Export investigation report

Restrictions:

- Cannot delete records
- Cannot manually edit transaction data

9.6 Fraud Analyst

Countries:

- Assigned countries only

Permissions:

- View fraud alerts
- View device risk
- View transaction risk
- Restrict device
- Restrict account
- Hold suspicious transaction
- Escalate to compliance

Restrictions:

- Cannot approve KYC/KYB unless granted
- Cannot change settlement account

9.7 Settlement Analyst

Countries:

- Assigned countries only

Permissions:

- View settlements
- View settlement failures
- Retry payout, if allowed
- Export settlement report
- Add settlement note
- Escalate failed payout

Restrictions:

- Settlement hold/release requires approval.
- Cannot edit transaction amount.
- Cannot approve KYB.

9.8 Device Operations Agent

Countries:

- Assigned countries only

Permissions:

- View physical terminals
- View phone POS devices
- Update terminal request status
- Assign terminal
- Block lost device
- View device health
- View activation requests

Restrictions:

- Cannot approve merchant KYB
- Cannot view full settlement account
- Cannot change merchant limits

9.9 Support Agent

Countries:

- Assigned countries only

Permissions:

- View support tickets
- Respond to tickets
- View limited customer profile
- View limited merchant profile
- View transaction status
- Resend receipt
- Escalate case

Restrictions:

- Cannot approve KYC/KYB
- Cannot view full documents by default
- Cannot block account without escalation

9.10 Dispute Analyst

Countries:

- Assigned countries only

Permissions:

- View disputes
- Request merchant evidence
- Upload dispute evidence
- Update dispute status
- View receipt
- View transaction metadata

Restrictions:

- Cannot change transaction amount
- Cannot release settlement
- Cannot approve KYB

9.11 Engineering Read-Only

Countries:

- Depends on assignment

Permissions:

- View system health
- View masked logs
- View non-sensitive errors
- View integration status
- Trigger safe sync jobs

Restrictions:

- No PII documents by default
- No financial action
- No compliance approval
- No staff creation

10. Country-Based Data Access

Every sensitive record must include country code.

Examples:

- Customer countryOfResidence
- Merchant countryOfOperation
- Transaction country
- Settlement country
- Device country
- Support ticket country
- KYC country
- KYB country

When staff opens a page, backend must check:

```
Does staff have this country?  
Does staff have this department permission?  
Does staff role allow this action?  
Does the action require approval?
```

A frontend-only check is not enough. Backend must enforce all permissions.

11. Admin Pages by Department

11.1 Compliance Admin Pages

Pages:

- KYC Queue
- KYB Queue
- Sanctions/PEP Queue
- Manual Review
- Rejected Cases
- Approved Cases
- Document Requests
- Regulatory Reports
- AML Cases

KYC Queue fields:

- Customer name
- Country
- Nationality
- Risk score
- Submitted date
- Required documents
- Status
- Assigned reviewer
- SLA timer

KYB Queue fields:

- Merchant name
- Country
- Business type
- Risk category
- Submitted date
- Missing documents
- Status
- Assigned reviewer
- SLA timer

Actions:

- Open case
- Approve
- Reject
- Request document
- Escalate
- Assign reviewer
- Add note

11.2 Risk/Fraud Admin Pages

Pages:

- Fraud Alerts
- Device Risk
- Transaction Monitoring
- Suspicious Merchants
- Suspicious Customers
- Velocity Rules
- Watchlists
- Risk Cases

Fraud alert fields:

- Alert ID
- Country
- Entity type
- Entity name
- Trigger
- Severity
- Transaction amount
- Device
- Created date
- Status

Actions:

- Restrict account
- Block device
- Hold settlement
- Escalate to compliance
- Close false positive
- Add watchlist entry

11.3 Merchant Operations Pages

Pages:

- Merchant List
- Merchant Onboarding
- Terminal Requests
- Phone POS Requests
- Branches
- Merchant Staff
- Merchant Support
- Merchant Activity

Actions:

- View merchant
- Request documents

- Update terminal request
- Assign device
- Escalate KYB
- Contact merchant
- Create support case

11.4 Device Operations Pages

Pages:

- Terminal Inventory
- Terminal Requests
- Terminal Activation
- Phone POS Devices
- Device Health
- Lost/Damaged Devices
- Device Events

Actions:

- Assign terminal
- Mark shipped
- Mark delivered
- Activate terminal
- Block terminal
- Replace terminal
- Approve phone POS device
- Reject phone POS device

11.5 Finance Pages

Pages:

- Settlement Batches
- Failed Settlements
- Reconciliation
- Merchant Fees
- Reserves
- Payout Accounts
- Finance Reports

Actions:

- View settlement
- Export report
- Retry failed settlement
- Recommend hold
- Recommend release
- Add finance note

11.6 Support Pages

Pages:

- Customer Tickets
- Merchant Tickets
- Terminal Tickets
- Payment Tickets
- Escalations
- SLA Dashboard

Actions:

- Reply
- Assign
- Escalate
- Close ticket
- Add internal note
- Link transaction
- Link merchant
- Link device

11.7 Dispute Pages

Pages:

- New Disputes
- Awaiting Merchant Evidence
- Evidence Submitted
- Under Review
- Won/Lost
- Expired

Actions:

- Request evidence
- Upload evidence
- Update status
- Add note
- Escalate fraud

12. Approval Workflows

Some actions must require one or two approvals.

12.1 Single Approval

Examples:

- Approve low-risk KYC
- Approve low-risk KYB

- Approve phone POS device
- Block lost terminal
- Update terminal delivery status

12.2 Dual Approval

Examples:

- Release settlement hold
- Approve high-risk merchant
- Approve PEP customer
- Create country admin
- Change country KYC rules
- Change country transaction limits
- Manually adjust merchant fees
- Unblock fraud-restricted account
- Export large sensitive dataset

12.3 Approval Record

Each approval must store:

- Request ID
- Requested by
- Approved by
- Approval level
- Reason
- Timestamp
- Country
- Entity affected
- Before value
- After value
- IP address
- Device/browser

13. Admin Audit Logs

Every admin action must be logged.

Audit log fields:

- id
- staffId
- staffName
- department
- role
- country
- action
- entityType
- entityId
- beforeValue

- afterValue
- reason
- ipAddress
- deviceFingerprint
- createdAt

Audit log must be immutable.

Logged actions:

- Login
- Failed login
- MFA success/failure
- View sensitive document
- Approve KYC
- Reject KYC
- Approve KYB
- Reject KYB
- Block account
- Unblock account
- Hold settlement
- Release settlement
- Create staff
- Change staff role
- Change country rule
- Export report
- View full document
- Download document
- Reset MFA
- Force logout

14. Admin Security Requirements

Admin Portal must enforce:

- MFA for all staff
- Strong passwords
- Role-based access control
- Country-based access control
- Department-based access control
- Session timeout
- Sensitive action re-auth
- IP/device logging
- Export limits
- Immutable audit logs
- Staff status checks
- Backend permission enforcement
- Least privilege access
- No shared accounts

Admin Portal must block:

- Suspended staff
- Removed staff
- Staff with no country access
- Staff with no department
- Staff with expired password
- Staff without MFA
- Login from blocked IP/device where enabled

15. Admin Database Tables

admin_staff

- id
- firstName
- lastName
- email
- phone
- departmentId
- roleId
- managerId
- status
- mfaEnabled
- passwordHash
- lastLoginAt
- failedLoginCount

16. Admin API Endpoints

Auth

- POST /admin/auth/login
- POST /admin/auth/mfa/verify
- POST /admin/auth/logout
- POST /admin/auth/refresh
- POST /admin/auth/password/reset
- POST /admin/auth/re-authenticate

Staff

- GET /admin/staff
- POST /admin/staff
- GET /admin/staff/{staffId}
- PATCH /admin/staff/{staffId}
- POST /admin/staff/{staffId}/suspend
- POST /admin/staff/{staffId}/unlock
- POST /admin/staff/{staffId}/reset-mfa
- POST /admin/staff/{staffId}/force-logout
- PATCH /admin/staff/{staffId}/countries
- PATCH /admin/staff/{staffId}/permissions

Departments and roles

- GET /admin/departments
- POST /admin/departments
- GET /admin/roles
- POST /admin/roles
- PATCH /admin/roles/{roleId}
- GET /admin/permissions
- PATCH /admin/roles/{roleId}/permissions

Countries

- GET /admin/countries
- POST /admin/countries
- GET /admin/countries/{countryCode}
- PATCH /admin/countries/{countryCode}
- GET /admin/countries/{countryCode}/dashboard
- PATCH /admin/countries/{countryCode}/kyc-rules
- PATCH /admin/countries/{countryCode}/kyb-rules
- PATCH /admin/countries/{countryCode}/device-rules
- PATCH /admin/countries/{countryCode}/settlement-rules
- PATCH /admin/countries/{countryCode}/risk-rules
